Maintenance And Care Instructions

AllView is a low maintenance product. Like any home furniture, we recommend you use care when handling AllView. An occasional dusting or cleaning should keep your shutters looking like new for years to come. When cleaning, use a moist towel that will remove all dust. Soap and water or other non abrasive household cleaners will work well. Do not use abrasive liquids or acetone based cleaning solutions.

For proper cleaning, open shutter panel and close the louvers upward. Clean both sides of the shutter using a moist cloth. Then tilt the louvers downward and clean the the panel in this position to ensure both sides are completely clean. An occasional cleaning of the surface will keep dirt accumulation and any staining off the product.

Congratulations on your purchase.
